

Grader Blade. Turn your Bobcat loader into a high-performance grading machine thanks to our graders. The 6-way, hydraulically controlled blade is easy to operate by switches located on the steering levers. Optional laser control system offers more precise control (up to 6mm accuracy) while saving concrete, time and labour. This tool is designed for landscaping, asphalt, curb, gutter and concrete flatwork projects.

Bucket. Tilt-Tatch™ increases the versatility of Bobcat® buckets, pallet forks and other attachments. This hydraulic tool can rotate an attachment 15° from centre to the right or left. Use it to keep loads level on sloping terrain or make a level cut on a hillside. You can even dig drainage ditches with the corner of the bucket. Note: Use of Tilt-Tatch™ will reduce operating capacity and tip load by approximately 20%. See the Tilt-Tatch™ Operators Manual for New Load Ratings. Note: Tilt-Tatch™ can be used with non-hydraulic attachments only. • Digs drainage ditches with the corner of the bucket.

Laser Receiver. This laser equipment offers you advanced, innovative features that will enable you to grade faster and with greater accuracy.

Soil Conditioner A

versatile, cost-effective attachment for all landscaping professionals. The Bobcat Soil Conditioner saves time and labour when smoothing ruts, moving material or levelling mounds of earth. Produces a perfect bed for seeding or laying grass turf.

Fork Head.

These Bobcat Pallet Forks are ideal for handling any kind of bulky or bagged material, from fertiliser to seed and animal feed. Especially handy when working in restricted spaces or along narrow aisles and rows.

Dumper Hopper.

For saving time and work when moving materials, you can't beat the Bobcat dumping hopper. Simply park it, load it, and dump it...it's child play! This convenient attachment mounts as easily as a bucket on your loader and can be transported, detached, and parked wherever it is needed - even in confined spaces. The large-capacity dumping hopper is easy to fill with a skid-steer loader, compact excavator or by hand. Flat and smooth interior surfaces prevent material from sticking. Quickly move sand, gravel, cement, topsoil, and other bulk materials around the jobsite. This tool is ideal for construction, landscaping,

This high-torque,

heavy-duty hydraulic auger gives you speed and perfect vertical accuracy. Its unique "knuckle-joint" design allows it to hang perfectly vertical on flat or uneven terrain. The entire drive unit follows the bit into the hole, adding 30 cm more dig depth than a standard unit. This is the ideal tool for drilling holes for posts, piers, poles, and trees in all kinds of soil conditions. Choose from 3 types of bits to best suit the ground conditions (standard, heavy and rock) and from numerous widths to best meet your hole-width requirement.
